WE'RE HIRING

Mechanical BIM Modeler with AutoCAD Expertise

Location: Wakra

Job Summary:

- We are seeking a skilled BIM Modeler with expertise in AutoCAD to join our team. The successful candidate will be responsible for developing, coordinating, and managing BIM models for various construction projects. will collaborate with MEP engineers, architects, and other professionals to ensure the accuracy and efficiency of the models, ultimately contributing to the successful completion of projects.

Key Responsibilities

- Develop and maintain 3D BIM models using Autodesk Revit and AutoCAD.
- Collaborate with engineers, architects, and other stakeholders to ensure the accuracy and completeness of models.
- Create detailed drawings and plans based on project requirements.
- Assist in the coordination of design changes and updates in the BIM model.
- Conduct clash detection and resolve conflicts within the BIM environment.
- Generate quantity take-offs and material schedules from the BIM models.
- Ensure compliance with industry standards and project-specific guidelines.
- Provide technical support and training to team members on BIM and AutoCAD tools.
- Maintain organized and updated project documentation.
- Proficiency in AutoCAD, Revit
- Strong understanding of building construction, MEP systems
- Experience with clash detection and coordination using tools like Navisworks.
- Strong communication skills, both verbal and written.
- Autodesk Certified Professional).
- Experience with 4D/5D BIM modeling and simulations.
- Knowledge of other CAD software

Requirement:

- Candidate should be present in Qatar with valid QID
- Available to join immediately.
- Send us your Latest CV, Academic and Experience Certificates, etc.

REQUIREMENT FOR A LEADING MNC COMPANY, IRAQ

CV SELECTION

CLADDER - 16

A cladder is a skilled tradesperson who specializes in the installation of cladding materials on buildings as well as Shelters

The main role of a cladder is to install and maintain the exterior surfaces of a building, which could include metal, glass, stone, or other materials.

The cladder must be able to interpret technical drawings and specifications to determine the best materials and methods for the project.

They must have knowledge of different types of cladding systems and be able to choose the appropriate materials for the building's needs,

Taking into account factors such as weather conditions, thermal insulation, and aesthetic considerations.

The cladder must also be able to accurately measure and cut materials to fit the building's dimensions and contours.

In addition to installation, a cladder is responsible for maintaining and repairing cladding systems to ensure their longevity and integrity.

They must also follow safety procedures and regulations to ensure the safety of themselves and others on the job site.

Overall, the role of a cladder requires a high level of technical skill, attention to detail, and a commitment to quality workmanship.
